TO WHOM IT MAY CONCERN

To be let known that company Diesel Motori d.o.o. – Zagreb, Croatia established very good collaboration with Mack d.o.o. – Rijeka, Croatia and Lamprell Energy Limited, Dubai, U.A.E. during the refurbishment, modification and upgrading project of the self-elevating drilling rig „JUPITER“ at „Viktor Lenac“ Shipyard, Rijeka, Croatia. The company followed up mechanical and electrical pre-commissioning, initial start-up of diesel engines (CATERPILLAR 3512B – 1.170 kW – 5 pcs) and emergency genset (C18 – 395 kW) load and load sharing. Vibration analysis, termographic temperature and exhaust back pressure measurements have been also performed in collaboration with company STSI d.o.o. – Zagreb, Croatia. During their attendance at „Viktor Lenac“ Shipyard, Diesel Motori d.o.o. gave an outstanding performance and had shown knowledge and experience in all above mentioned activities. During service at the „Viktor Lenac“ Shipyard and subsequently company Diesel Motori d.o.o. gave very good cooperation to the Mack project team, we have been in contact, both socially and profesionally, and I can vouch in all respects for their conduct and character.

Very truly yours,

A. Vecerina
„Jupiter“ - Project coordinator
Member of the Managing Board
